

Application No. 10/607,905  
Supplement to Amendment Submitted with RCE  
January 23, 2009

## **REMARKS/ARGUMENTS**

This amendment is submitted by way of supplement to the amendment filed herein on January 15, 2009.

### **Drawings:**

The replacement drawings filed contemporaneously herewith include the amendments included in the Remarks/Arguments section of the amendment filed herein on January 15, 2009. The replacement drawings also include the addition of identifying labels to corresponding blocks, as follows:

-- FIG. 2: added “DEPOSITION CHAMBER” in block 205; “CONTROLLER” in block 230; “OPTICAL SPECTROMETER” in block 240; and “DATA FILE” in block 260.

Other minor changes were made by the draftsperson in the ordinary course of preparing replacement formal drawings to replace corresponding previously filed informal drawings. The shape of the showerheads 215 in the formal drawings schematically represents showerheads of the type used in PECVD tools, such as the Novellus Sequel System identified on page 21 of the specification. No new matter is introduced thereby.

Accordingly, request is made for withdrawal of the final nature of the action of December 3, 2008, reconsideration and allowance of the application as amended by the January 15, 2009, amendment and supplemented hereby.

Respectfully submitted,

/Warren L. Franz/
